

WELCOME AND COURSE INTRODUCTION

Module 00 — Governed AI Feature Delivery

WELCOME

-
-
-
-

WELCOME

- Thanks for joining.
-
-
-

WELCOME

- Thanks for joining.
- This is a hands-on bootcamp, not a theory lecture.
-
-

WELCOME

- Thanks for joining.
- This is a hands-on bootcamp, not a theory lecture.
- We will build one realistic AI feature end-to-end.
-

WELCOME

- Thanks for joining.
- This is a hands-on bootcamp, not a theory lecture.
- We will build one realistic AI feature end-to-end.
- The focus is safe, reusable delivery in real teams.

ABOUT ME

-

-

-

-

-

ABOUT ME

- I'm Kevin Cunningham, a developer educator, consultant, and speaker based in Northern Ireland.
-
-
-
-

ABOUT ME

- I'm Kevin Cunningham, a developer educator, consultant, and speaker based in Northern Ireland.
- I design and deliver hands-on training for engineers and technical teams.
-
-
-

ABOUT ME

- I'm Kevin Cunningham, a developer educator, consultant, and speaker based in Northern Ireland.
- I design and deliver hands-on training for engineers and technical teams.
- My work focuses on practical software delivery: APIs, backend systems, architecture, and AI-assisted development.
-
-

ABOUT ME

- I'm Kevin Cunningham, a developer educator, consultant, and speaker based in Northern Ireland.
- I design and deliver hands-on training for engineers and technical teams.
- My work focuses on practical software delivery: APIs, backend systems, architecture, and AI-assisted development.
- Before software full time, I taught maths - that still shapes how I teach: structured, practical, and clear.
-

ABOUT ME

- I'm Kevin Cunningham, a developer educator, consultant, and speaker based in Northern Ireland.
- I design and deliver hands-on training for engineers and technical teams.
- My work focuses on practical software delivery: APIs, backend systems, architecture, and AI-assisted development.
- Before software full time, I taught maths - that still shapes how I teach: structured, practical, and clear.
- My goal today is simple: give you patterns you can actually apply after the course.

HOW I TEACH

-
-
-
-

HOW I TEACH

- Problem first -> pattern -> implementation.
-
-
-

HOW I TEACH

- Problem first -> pattern -> implementation.
- Short concept blocks, then demos and labs.
-
-

HOW I TEACH

- Problem first -> pattern -> implementation.
- Short concept blocks, then demos and labs.
- Realistic scenarios over toy examples.
-

HOW I TEACH

- Problem first -> pattern -> implementation.
- Short concept blocks, then demos and labs.
- Realistic scenarios over toy examples.
- Questions are welcome throughout.

WHAT THIS COURSE IS

-
-
-
-

WHAT THIS COURSE IS

- A two-day engineering bootcamp for governed AI feature delivery.
-
-
-

WHAT THIS COURSE IS

- A two-day engineering bootcamp for governed AI feature delivery.
- Stack context: TanStack frontend, NestJS backend, gateway patterns.
-
-

WHAT THIS COURSE IS

- A two-day engineering bootcamp for governed AI feature delivery.
- Stack context: TanStack frontend, NestJS backend, gateway patterns.
- We cover workflows, guardrails, UX, evals, and deployment governance.
-

WHAT THIS COURSE IS

- A two-day engineering bootcamp for governed AI feature delivery.
- Stack context: TanStack frontend, NestJS backend, gateway patterns.
- We cover workflows, guardrails, UX, evals, and deployment governance.
- You leave with reusable patterns, not just demo code.

WHAT THIS COURSE IS NOT

-
-
-
-

WHAT THIS COURSE IS NOT

- Not a deep dive on model internals.
-
-
-

WHAT THIS COURSE IS NOT

- Not a deep dive on model internals.
- Not a prompt-only workshop.
-
-

WHAT THIS COURSE IS NOT

- Not a deep dive on model internals.
- Not a prompt-only workshop.
- Not a chat UI tutorial.
-

WHAT THIS COURSE IS NOT

- Not a deep dive on model internals.
- Not a prompt-only workshop.
- Not a chat UI tutorial.
- Not one-off experimentation without delivery standards.

OUTCOMES BY THE END

You should be able to:

- 1.
- 2.
- 3.
- 4.
- 5.

OUTCOMES BY THE END

You should be able to:

1. Design AI features with clear architectural boundaries.
- 2.
- 3.
- 4.
- 5.

OUTCOMES BY THE END

You should be able to:

1. Design AI features with clear architectural boundaries.
2. Implement governed backend workflows.
- 3.
- 4.
- 5.

OUTCOMES BY THE END

You should be able to:

1. Design AI features with clear architectural boundaries.
2. Implement governed backend workflows.
3. Apply guardrails and validation controls.
- 4.
- 5.

OUTCOMES BY THE END

You should be able to:

1. Design AI features with clear architectural boundaries.
2. Implement governed backend workflows.
3. Apply guardrails and validation controls.
4. Build reviewable AI UX patterns.
- 5.

OUTCOMES BY THE END

You should be able to:

1. Design AI features with clear architectural boundaries.
2. Implement governed backend workflows.
3. Apply guardrails and validation controls.
4. Build reviewable AI UX patterns.
5. Use evals and deployment gates for safe release.

COURSE FLOW

| Day 1 | Day 2 |

| ----- | -----
-- || Foundations and backend integration | Frontend
patterns and evaluation | | Workflow/tool/agent decisions |
Deployment, observability, governance | | Security and
guardrails | Final build and review |

COURSE FLOW

| Day 1 | Day 2 |

| ----- | -----

-- || Foundations and backend integration | Frontend
patterns and evaluation | | Workflow/tool/agent decisions |
Deployment, observability, governance | | Security and
guardrails | Final build and review |

Each module builds on the same scenario.

LAB THREAD WE WILL BUILD

-
-
-
-
-
-

LAB THREAD WE WILL BUILD

- Document/text intake
-
-
-
-
-

LAB THREAD WE WILL BUILD

- Document/text intake
- Structured extraction
-
-
-
-

LAB THREAD WE WILL BUILD

- Document/text intake
- Structured extraction
- Classification/routing
-
-
-

LAB THREAD WE WILL BUILD

- Document/text intake
- Structured extraction
- Classification/routing
- Validation and fallback
-
-

LAB THREAD WE WILL BUILD

- Document/text intake
- Structured extraction
- Classification/routing
- Validation and fallback
- Reviewable frontend experience
-

LAB THREAD WE WILL BUILD

- Document/text intake
- Structured extraction
- Classification/routing
- Validation and fallback
- Reviewable frontend experience
- Evaluation and release readiness

HOW TO GET VALUE FROM THIS BOOTCAMP

-
-
-
-

HOW TO GET VALUE FROM THIS BOOTCAMP

- Share your real constraints and edge cases.
-
-
-

HOW TO GET VALUE FROM THIS BOOTCAMP

- Share your real constraints and edge cases.
- Use labs to test your own design assumptions.
-
-

HOW TO GET VALUE FROM THIS BOOTCAMP

- Share your real constraints and edge cases.
- Use labs to test your own design assumptions.
- Ask "where should this logic live?" often.
-

HOW TO GET VALUE FROM THIS BOOTCAMP

- Share your real constraints and edge cases.
- Use labs to test your own design assumptions.
- Ask "where should this logic live?" often.
- Focus on what your team can adopt next week.

FINDING OUT ABOUT YOU

Let's do a quick pulse check:

-
-
-
-

FINDING OUT ABOUT YOU

Let's do a quick pulse check:

- Your role and current focus
-
-
-

FINDING OUT ABOUT YOU

Let's do a quick pulse check:

- Your role and current focus
- Your AI project maturity (prototype, pilot, production)
-
-

FINDING OUT ABOUT YOU

Let's do a quick pulse check:

- Your role and current focus
- Your AI project maturity (prototype, pilot, production)
- Your biggest delivery concern (quality, safety, speed, governance, UX)
-

FINDING OUT ABOUT YOU

Let's do a quick pulse check:

- Your role and current focus
- Your AI project maturity (prototype, pilot, production)
- Your biggest delivery concern (quality, safety, speed, governance, UX)
- One thing you want to leave with by end of day 2

QUICK ROOM POLL

WHICH BEST DESCRIBES YOUR CURRENT AI WORK?

-
-
-
-

QUICK ROOM POLL

WHICH BEST DESCRIBES YOUR CURRENT AI WORK?

- A) Exploring ideas / prototypes
-
-
-

QUICK ROOM POLL

WHICH BEST DESCRIBES YOUR CURRENT AI WORK?

- A) Exploring ideas / prototypes
- B) Building first internal workflows
-
-

QUICK ROOM POLL

WHICH BEST DESCRIBES YOUR CURRENT AI WORK?

- A) Exploring ideas / prototypes
- B) Building first internal workflows
- C) Shipping client-facing features
-

QUICK ROOM POLL

WHICH BEST DESCRIBES YOUR CURRENT AI WORK?

- A) Exploring ideas / prototypes
- B) Building first internal workflows
- C) Shipping client-facing features
- D) Scaling and standardizing across teams

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

-
-
-
-
-

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

- A) Architecture and workflow design
-
-
-
-

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

- A) Architecture and workflow design
- B) Guardrails and safety controls
-
-
-

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

- A) Architecture and workflow design
- B) Guardrails and safety controls
- C) UX and product integration
-
-

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

- A) Architecture and workflow design
- B) Guardrails and safety controls
- C) UX and product integration
- D) Evaluation and release confidence
-

QUICK ROOM POLL

WHERE IS YOUR CURRENT BIGGEST CHALLENGE?

- A) Architecture and workflow design
- B) Guardrails and safety controls
- C) UX and product integration
- D) Evaluation and release confidence
- E) Deployment and governance process

WORKING AGREEMENT

-
-
-
-

WORKING AGREEMENT

- Assume good intent; ask direct questions.
-
-
-

WORKING AGREEMENT

- Assume good intent; ask direct questions.
- Keep examples practical and concrete.
-
-

WORKING AGREEMENT

- Assume good intent; ask direct questions.
- Keep examples practical and concrete.
- Prefer clarity over jargon.
-

WORKING AGREEMENT

- Assume good intent; ask direct questions.
- Keep examples practical and concrete.
- Prefer clarity over jargon.
- Capture useful patterns we can reuse after the course.

BEFORE WE START MODULE 1

-
-
-

BEFORE WE START MODULE 1

- Do we have environment access sorted?
-
-

BEFORE WE START MODULE 1

- Do we have environment access sorted?
- Any critical constraints to incorporate up front?
-

BEFORE WE START MODULE 1

- Do we have environment access sorted?
- Any critical constraints to incorporate up front?
- Any must-answer questions for today?
